

ProScape 22-0-6

Fertilizer with
Dimension® 0.13%

Contains:

A premium preemergent homogeneous product with postemergent activity on many annual grasses with 40% MESA nitrogen. Ideal to use in situations where zero phosphorus is desired.

GUARANTEED ANALYSIS

Total Nitrogen (N) 22%

3.2% Ammoniacal Nitrogen

1.5% Water Insoluble Nitrogen

13.9% Urea Nitrogen

3.4% Other Water Soluble Nitrogen

Soluble Potash (K₂O) 6%

Sulfur (S) 3.5%

3.5% Coated Sulfur (S)

Chlorine (Cl) not more than 7.0%

Active Ingredients:

Dithiopyr 0.13%

Derived from: Ammonium Sulfate, Methylene Ureas, Ureas, Muriate of Potash

Uses & Features:

A premium zero phosphorus fertilizer herbicide combination product which provides preemergent and early postemergent control of many annual grassy weeds. The zero phosphorus formula is ideal for soils where phosphorus is not needed during preemergent application. MESA combines Meth-Ex[®] methylene urea with ammonium sulfate. The result is a homogeneous slow release granule that delivers brilliant color, quick response, and extended feeding without flush growth or excessive clippings. Dimension is a premium control choice for annual grassy weeds and small seeded broadleaf weeds. It provides early postemergent control of crabgrass prior to the tillering stage. This extends the window for crabgrass control application by 2 to 4 weeks giving you more time to achieve control. Dimension provides superior control without staining and is safe for ornamentals and flowers that are growing adjacent to your turf.

Specifications:

Product Number: 22-53589

Packaged: 50 LB. Bag, 48 bags/pallet
