

Granules LG Wood Pellets

With high and constant energy efficiency, the LG Wood Pellets are an environmentally friendly and efficient solution for your heating.

Ash - .39%

Softwood

Moisture - 6.5%

BTU's - 8,600 (moisture -free)

BTU's - 8,190 (as received)

Granules LG wood pellets are known for their superior heating value and have become very popular because they consistently deliver high BTU's and low ash. They are 100% natural product and consistently surpass industry standards for pellet fuel.

They are softwood pellets manufactured from Black Spruce and Grey Pine, and are produced at a state-of-the-art pellet mill in Quebec, Canada.
