Feeding Directions: Everyday Guinea Pig Pellets are designed to be fed to guinea pigs in the following suggested manner:

The newborn guinea pig can consume solid food almost immediately. In the wild the guinea pig's diet is mainly green vegetation and fruits. It is not necessary to feed greens or fruits when feeding Guinea Pig Pellets. Feed Everyday Guinea Pig Pellets in a self-feeder (one they cannot sit in). Guinea pigs eat many small meals each day. Guinea pigs are unique in that they require a nutritional source of Vitamin C.

Always provide plenty of clean fresh water.

The suggested feeding program is for use as a guide only. The animal's requirements may change due to breed, environment, and management.
