The suggested feeding program is for use as a guide only. The animal's requirements may change due to breed, environment, and management.

Feeding Directions:

Cows -Beef: To be fed at the rate of 1lb/100 lb of bodyweight/day. Feed high quality hay, haylages and/or pastures. Always provide plenty of clean fresh water.

Goats: To be fed at the rate of 1lb/100lb of bodyweight/day. Feed high quality hay, haylages, and/or pastures. Always provide plenty of clean fresh water.

Sheep: As a creep feed to lambs - feed at a rate of ¼ to ½ lb/head/day increasing as needed to obtain desired growth. Ewes and Rams – feed at a rate of 3lb/head/day depending on body condition. Feed high quality hay/pasture. Always provide salt and clean fresh water.

Amount of concentrate depends on quality of forage and condition of animal. A vitamin and mineral supplement appropriate to species should be fed together with this feed.
